

City Wide Check-Ins Admin Instructions

Moving forward, we will be using a simple and efficient system to handle cleaning crew check-ins. Please refer to these instructions on how to use the website as an administrator.

Account Set Up

For admin accounts, an existing administrator must create your username for you. Then, they will send you a link to set the password for your account. Click this link and create a password to finish setting up your account.

**Please note that the username field will be filled automatically when you open your personalized link. You cannot create an account with any other name.*

A screenshot of a web form titled 'Reset Password' for City Wide Facility Solutions. The form is set against a light gray background. At the top is the company logo. Below the logo, the title 'Reset Password' is in a bold, black font. The form contains three input fields: 'Username:' with the text 'Example Account' inside, 'New Password:' with a toggle icon (an eye in a circle) to its right, and 'Confirm New Password:'. At the bottom of the form is a button labeled 'Confirm'.

After you have created your account, you can get your personalized account link. Enter the “All Accounts” page, find your account in the table, and click the copy button under “Account Link”. You might want to bookmark this link, as it will take you to the login page with your username filled in automatically.

If you ever forget your password, reach out to another admin to get a password reset link.

Viewing Buildings

Once logged in, you will see a table of buildings. Here, you can see the building name, which City Wide manager is responsible for it, the IC assigned to it, the days it gets cleaned, whether the crew has arrived today, and the time they checked in.

By default, the “Today Only” filter will be turned on, showing only buildings that are scheduled to get cleaned on the current day. You can uncheck this to see all buildings. You can also use the manager and IC filters to view only buildings that are assigned to a specific manager or contractor.

When more than 20 buildings exist for the current filter, a “Load All” button will appear. Click this to view the entire list of buildings for that filter.

QR Check-In

Moving forward, our preferred method of having crews check in will be by QR code. At each building they will find a half-sheet, usually in the janitor's closet, that looks like the image below. You have access to print this half-sheet for any of your buildings using the "QR" column in the table.

The crew will use their mobile phone camera to scan the code and open the link that it provides.

When they scan this code, they will be taken to a confirmation page, indicating that they have done all they need to do to check in. If the check in does not go through for some reason, they will see an error page and they will be told to reach out to someone at City Wide. If they reach out to you about an issue, notify Nikki so that it can be resolved.

Manual Check-In

You also have the option to manually check crews in. just click on the “X” and click “OK” to register that building as checked-in for the day.

Editing Buildings

As an admin, you can edit building information by clicking the pen symbol in the last column of the table. This will open a menu where you can change the buildings name, manager, IC, and the days it is cleaned.

You can also work with multiple buildings at a time by using the select checkboxes on the leftmost column of the table. Select one at a time, or to select all currently visible buildings, click the checkbox in the header row at the very top.

With buildings selected, you can

- 1) Print QR sheets for multiple buildings at a time
- 2) Delete buildings (selecting is the only way to delete buildings, even if it's just one)
- 3) Change manager or IC for all buildings selected

actions performed on large selections may take a long time.

Adding New Buildings

This system is not synced with CRM. When we get new buildings, contractors, or managers, they must be added to this system separately.

To add a new building to the system, click the “Add Building” button on the home page. Enter a building name, select a manager, and search for your desired contractor. Select the days the building is scheduled to be cleaned, use the common case checkboxes for convenience if one of them applies.

*Buildings entered into this system must have unique names. If you try to add a building with the same name as an existing one, it will not let you. If you must have a duplicate entry for the purpose of tracking multiple crews, add something to the end of the building names to distinguish them, like “#2” or “(nighttime)”.

Adding New Managers/Contractors

To add a new manager or contractor to the system, click on the “Contractors” or “Managers” button on the home page. Then type the name into the text box and hit submit.

Adding a contractor/manager to the list allows you to assign buildings to them, but they will still need to make an account to access the system themselves. For them to make an account, an admin must copy their account link and send it to them. Every contractor/manager should be given access to their account link.

Add New Contractor

Contractor Name	Account Link	Password Reset Link	Status	Delete
2 Sparkles LLC			Account not made	
A and N Cleaning Services Inc.			Account not made	
Alvarados Cleaning Company			Account not made	
Armstrong Maintenance Services Corp.			Account not made	
B & M Cleaning Detail Services LLC			Account not made	

If a contractor or manager reaches out to have their password reset, click the button under “Password Reset Link” to copy their link and send it to them. They will have 24 hours to reset their password with this link. If they fail to do it in 24 hours, click the button again and send them the new link.

			Account not made	
Ecoclean Janitorial Services Inc.			Account not made	
ELJ Enterprise Group, Inc.			Account not made	
Example Contractor			24h until link expires	
Fagavi LLC			Account not made	
G&T Cleaning Service Inc.			Account not made	

You can also delete contractors and managers as long as there are no longer any buildings assigned to them. Deleting a name will automatically delete the associated account, ensuring the user no longer has access to our system.

Viewing All Accounts

To view all the existing accounts in one place, click the “All Accounts” button on the home page. Here, you can get account links and password reset links, and you can delete accounts without deleting their underlying contractor or manager entry. If you need to remove a contractor or managers account, but you don’t want them removed from the system entirely, delete the account from this menu.

All Accounts

ADMIN	Account Link	Password Reset Link	Status	Delete
Example Account				
nfreeman@gocitywide.com				
MANAGER	Account Link	Password Reset Link	Status	Delete
John Doe				
CONTRACTOR	Account Link	Password Reset Link	Status	Delete
Example Contractor			24h until link expires	

In this menu, you can also create a new admin account. Just enter the username for the new account and hit submit. Then, send the password reset link to the person the account belongs to so that they can create their own password. Until the user sets their password, the account will not actually exist.

Create New Admin Account

Enter the username and then have the user reset the password (they cannot login until the password is set).

Username:

All Accounts

ADMIN	Account Link	Password Reset Link	Status	Delete
Example Account				
New Account			Password not set	
nfreeman@gocitywide.com				

If you want to change your username, just create yourself a new admin account, log into it, and delete your old account.

Archives

You are also able to access check-in archives of any previous day. Click the “Archives” button on the home page and select a date to see the check-in records from that day.

*Please note that the archives only show buildings that were scheduled to be cleaned on the selected day.

Date08/22/2025

Filter Manager---

Archive: August 22, 2025

Name	Manager		Time Checked
Example Building 1	John Doe		
Example Building 2	John Doe		Aug 22, 8:12 PM
Example Building 3	Jane Doe		
Example Building 4	John Doe		

Instead of resetting the check-ins at midnight as the day switches over, this system resets at 3AM to account for late night services. Every day at 3AM, all check-ins get reset and the records for the day are put into the archives.
