

City Wide Check-Ins Contractor Instructions

Moving forward, you will have access to the same database we will be using to see when your crew(s) arrive at buildings. Please refer to these instructions on how to use the website.

Account Set Up

You should have received an email from your City Wide point of contact containing a link that is specialized for your account. Click this link and create a password to finish setting up your account.

*Please note that your username will be the name of your business, and the username field will be filled automatically when you open your personalized link. You cannot create an account with any other name.

A screenshot of a web form titled 'Create contractor account' on a light gray background. At the top is the City Wide Facility Solutions logo. Below the title, there are three input fields: 'Username:' with the placeholder text 'Example Account', 'Password:' with a toggle icon (an eye in a circle), and 'Confirm Password:'. At the bottom is a 'Create Account' button.

After you have created your account, that same link will send you directly to your login screen, with your username automatically filled for you.

If you ever forget your password, reach out to your City Wide point of contact to get a password reset link.

Viewing Buildings

Once logged in, you will see a table listing all buildings assigned to your business. Here, you can see the building name, which City Wide manager is responsible for it, the days it gets cleaned, whether the crew has arrived today, and the time they checked in.

By default, the “Today Only” filter will be turned on, showing only buildings that are supposed to get cleaned on the current day. You can also choose to filter by a specific manager.

When more than 20 buildings exist for the current filter, a “Load All” button will appear. Click this to view the entire list of buildings for that filter.

Name	Manager	☒	Checked Time	M	T	W	Th	F	Sat	Sun	QR
Example Building 1	John Doe	☐		M	T	W	Th	F	Sat	Sun	☐
Example Building 2	John Doe	☒	Aug 22, 8:12 PM	M		W		F			☐
Example Building 3	Jane Doe	☐		M	T	W	Th	F			☐
Example Building 4	John Doe	☐		M	T	W	Th	F	Sat		☐

QR Check-In

Moving forward, our preferred method of having crews check in will be by QR code. At each building they will find a half-sheet, usually in the janitor's closet, that looks like the image below. You have access to print this half-sheet for any of your buildings using the "QR" column in the table.

The crew will use their mobile phone camera to scan the code and open the link that it provides.

When they scan this code, they will be taken to a confirmation page, indicating that they have done all they need to do to check in. If the check in does not go through for some reason, they will see an error page and they will be told to reach out to someone at City Wide.

Manual Check-In

You also have the option to manually check your crews in. just click on the “X” and click “OK” to register that building as checked-in for the day.

Archives

You are also able to access check-in archives of any previous day. Click the “Archives” button on the home page and select a date to see our records of your buildings from that day.

*Please note that the archives only show buildings that were scheduled to be cleaned on the selected day.

Archive: August 22, 2025

Name	Manager		Time Checked
Example Building 1	John Doe		
Example Building 2	John Doe		Aug 22, 8:12 PM
Example Building 3	Jane Doe		
Example Building 4	John Doe		

Instead of resetting the check-ins at midnight as the day switches over, this system resets at 3AM to account for late night services. Every day at 3AM, all check-ins get reset and the records for the day are put into the archives.
