

City Wide Check-Ins Manager Instructions

Moving forward, we will be using a simple and efficient system to handle cleaning crew check-ins. Please refer to these instructions on how to use the website.

Account Set Up

You should have received an email containing a link that is specialized for your account. Click this link and create a password to finish setting up your account.

*Please note that your username will be your name in CRM, and the username field will be filled automatically when you open your personalized link. You cannot create an account with any other name.

A screenshot of a web form titled 'Create manager account' on a light gray background. At the top is the City Wide Facility Solutions logo. Below the logo, the title 'Create manager account' is displayed in bold black text. The form contains three input fields: 'Username:' with the text 'John Doe' entered, 'Password:' with a toggle icon (an eye) to its right, and 'Confirm Password:'. At the bottom of the form is a button labeled 'Create Account'.

After you have created your account, that same link will send you directly to your login screen, with your username automatically filled for you.

If you ever forget your password, reach out to Nikki to get a password reset link.

Viewing Buildings

Once logged in, you will see a table of buildings. Here, you can see the building name, which City Wide manager is responsible for it, the IC assigned to it, the days it gets cleaned, whether the crew has arrived today, and the time they checked in.

By default, the “Manager” filter will be set to your name and the “Today Only” filter will be turned on, showing only buildings that are assigned to you and are scheduled to get cleaned on the current day. If you need to see any buildings that aren’t assigned to your name in the system, you can change the “Manager” filter to somebody else’s name or to “---” to show buildings from all managers. You can also uncheck “Today Only” if you need to see more buildings, and you can filter by IC if you want to see only buildings assigned to a certain contractor.

When more than 20 buildings exist for the current filter, a “Load All” button will appear. Click this to view the entire list of buildings for that filter.

Name	Manager	IC	☒	Checked Time	M	T	W	Th	F	Sat	Sun	QR
Example Building 1	John Doe	Example Contractor	☒		M	T	W	Th	F	Sat	Sun	☐
Example Building 2	John Doe	Example Contractor	☒		M	T	W	Th	F			☐
Example Building 3	John Doe	Example Contractor	☒		M		W		F			☐

QR Check-In

Moving forward, our preferred method of having crews check in will be by QR code. At each building they will find a half-sheet, usually in the janitor's closet, that looks like the image below. You have access to print this half-sheet for any building using the "QR" column in the table.

The crew will use their mobile phone camera to scan the code and open the link that it provides.

When they scan this code, they will be taken to a confirmation page, indicating that they have done all they need to do to check in. If the check in does not go through for some reason, they will see an error page and they will be told to reach out to their City Wide point of contact. If they reach out to you about an issue, notify Nikki so that it can be resolved.

Archives

You are also able to access check-in archives of any previous day. Click the “Archives” button on the home page and select a date to see the check-in records from that day. This table will also automatically filter to your name, but feel free to change that if you need to see more buildings.

*Please note that the archives only show buildings that were scheduled to be cleaned on the selected day.

Filter Manager

John Doe

Archive: August 22, 2025

Name	Manager	IC		Time Checked
Example Building 1	John Doe	Example Account		
Example Building 2	John Doe	Example Account		Aug 22, 8:12 PM
Example Building 4	John Doe	Example Account		

Instead of resetting the check-ins at midnight as the day switches over, this system resets at 3AM to account for late night services. Every day at 3AM, all check-ins get reset and the records for the day are put into the archives.
